In addition to providing long lasting protection for your wood deck, the GacoShield system allows you unmatched freedom to give it a unique and distinctive visual flair with the GacoShield color system. Whatever your style, our wide array of tasteful color choices will allow you unparalleled flexibility to match and enhance your home’s unique style.

Available Colors

Make It Simple: Choose One of Our Standard Colors

GacoShield offers a vast array of color options, thanks to our tint-based color system. You can either choose from one of the four standard color options shown below or select from one of the 54 tint-based colors shown on the following pages.

CEDAR * (49-DB)
COFFEE * (95-DB)
MADRONA * (96-DB)
STONE * (97-DB)

GacoShield allows homeowners to install high quality protection to their dimensional lumber deck, providing lasting surface protection plus a non-skid internal surface that cleans up easily. One gallon of GacoShield will cover 100 square feet.

GacoShield is the same top-quality, durable acrylic coating used by decking professionals. It creates a fully adhered, durable membrane which expands and contracts along with your deck. It is perfect for hot or cold climates, because the high-quality acrylic coating does not soften in the heat or become brittle from cold.

GacoShield is specially formulated to protect and preserve the life of your wood deck. Its unique chemistry allows the wood to breathe while protecting it as well. The result is an attractive and protective deck coating.
